This document is a disclosure by Fs International Limited (“Company”), which provides the services to the Client under the terms and conditions of the Client Agreement, of the potential risks involved in trading on financial markets. The Client should first and foremost be aware of the potential losses associated with this activity. However, due to the wide range of possible scenarios, this document cannot disclose all risks inherent in trading on financial markets.

Trading and the execution of financial transactions similar to those described and/or resulting from this agreement, with or without the use of high financial leverage, is speculative trading of high risk. You must carefully and seriously consider if this type of financial activity suits your needs, your financial resources and personal circumstances.

As the risk of losing some, or all, of the invested funds in a relatively short period of time is high, it is recommended that you use only funds which you have earmarked for speculative, high risk financial transactions.

1. High Volatile Instruments:

- 1.1. High financial leverage in the trading of currency, commodities and other financial assets, is created based on collateral of a low sum relative to the total transaction. The results of trading with high financial leverage are that a small change in market prices, within a short period of time, may cause substantial gain or loss, proportional to the size of the collateral, up to the total loss of the collateral sum in a very short period of time.
- 1.2. The fluctuation of the rates in the currency markets, commodities and financial derivatives are often sharp without the ability to forecast the size or direction of the change or the time frame in which it occurs.
- 1.3. Many instruments are traded within wide ranges of intraday price movements so the Client must carefully consider the fact that there is not only high probability of profit, but also of loss.

2. Technical Risk

- 2.1. The Client shall assume the risk of financial loss caused by the failure of information, communication, electronic and other systems.
- 2.2. When executing trading operations through the client terminal, the Client shall assume the risk of financial loss, which can be caused by:
 - a) the failure of Client hardware, software and internet connection;
 - b) the improper operation of Client equipment;
 - c) the wrong settings in the client terminal;
 - d) delayed client terminal updates;

- e) the Client's ignorance of the applicable rules

2.3. The Client acknowledges that at the moment of peak load there may be some difficulties in getting telephone communication with the duty operator, especially on the fast market (for example, when key economic indicators are released).

3. **Abnormal Market Conditions**

3.1. The Client shall acknowledge that under abnormal market conditions, the execution time for Client instructions may increase.

4. **Trading Platform**

- 4.1. The Client shall acknowledge that only one request or instruction is allowed in the queue. Once the Client has sent a request or instruction, any other request or instruction sent by the Client will be ignored. In the "Order" window, the "Order is locked" message will appear.
- 4.2. The Client shall acknowledge that the only reliable source of quoting information is the server for Clients with live accounts. The quote base in the client terminal shall not be considered a reliable source of quoting information, as in the case of a bad connection between the client terminal and the server, some of the quotes simply may not reach the client terminal.
- 4.3. The Client shall acknowledge that when the Client closes the window to place/modify/delete an order, as well as the window to open/close a position, the instruction or request which has been sent to the server will not be cancelled.
- 4.4. The Client shall assume the risk of executing unplanned transactions in the case that the Client sends another instruction before receiving the result from the instruction sent previously.
- 4.5. The Client shall acknowledge that if an order has already been executed but the Client sends an instruction to modify the level of a pending order and the levels of Stop Loss and/or Take Profit orders at the same time, the only instruction that will be executed is the instruction to modify the Stop Loss and/or Take Profit levels on the position opened on that order.

5. **Communications**

- 5.1. The Client shall assume the risk of any financial loss caused by the Client either not receiving a notification from the Company.
- 5.2. The Client shall hold full responsibility for the safekeeping of information received from the Company and assumes the risk of any financial loss caused by unauthorized access to the Client's trading account by a third party.

6. Force Majeure

6.1. The Client shall assume all risks of financial loss caused by a force majeure.

7. Statutory Prohibitions and Restrictions

7.1. The Client shall assume all financial and other risks when completing operations (or actions connected with these operations) on financial markets that are statutorily prohibited or restricted by the legislation of the country in which the Client is resident.
